

## Using Your Left-Handed Brain #4

Here's another example, showing how your left-handed brain can even create things that don't exist. It's called **Kanizsa's Triangle**. If you can see the white triangle – the one with its apex pointing up – it's because your left-handed brain has *created* that triangle to unify what is otherwise simply a collection of angles and Pac Man shapes. There is, in fact, no white triangle there.
